SUMMARY

Senior Game Developer with 6+ years of experience developing and shipping Android, iOS, WebGL, and PC games using Unity and C#. Experienced in gameplay programming, game systems, procedural generation, game feel, performance optimization, and cross-platform development. Strong understanding of player engagement and mobile game metrics, including playtime, retention, LTV, and CPI, with experience integrating monetization and third-party SDKs. Comfortable working independently or within remote teams to prototype, iterate, debug, and deliver polished game experiences.

TECHNICAL & SOFT SKILLS

- **Languages & Engines:** C#, Unity
- **Game Development:** Gameplay Systems, Game Mechanics, Game Feel, Level Design, Procedural Generation, Enemy AI, Game Physics, UI/UX, Shaders
- **Optimization & Performance:** Mobile Optimization, Memory Management, Profiling, Debugging
- **Monetization & Analytics:** Ads, In-App Purchases, Playtime, Retention, LTV, CPI, A/B testing
- **Tools & Workflows:** Git, Version Control, Cross-Platform Development, Playable Ads, Agile/Scrum, CI/CD, LiveOps
- **Engineering Practices:** OOP, Clean Code, Code Architecture, Problem-Solving
- **Soft Skills:** Team Collaboration, Communication, Adaptability, Self-Management, Continuous Learning, Leadership

EXPERIENCE

Sneet Games | Senior Game Developer

02/2024 – Present • Independent

- Independently develop hyper-casual, casual, and hybrid-casual mobile games using Unity and C#, focusing on core gameplay, game feel, player motivation, and stable performance.
- Design and iterate gameplay systems with focusing on playtime, retention, LTV, and CPI, player experience and engagement with mobile performance and commercial goals.

Squid Gun Studio | *Mid Game Developer*

04/2022 – 01/2024 • Remote

- Developed and rapidly prototyped casual mobile games using Unity and C#, iterating through testing to evaluate mechanics, improve game feel, and strengthen player engagement.
- Contributed to core gameplay, level design, asset optimization, and visual polish while maintaining stable performance through profiling and version control.

Game4Life Studio | *Junior Game Developer*

06/2021 – 03/2022 • Remote

- Developed and prototyped mobile gameplay features in Unity and C#, translating game concepts into functional, testable prototypes within a collaborative development team.
- Debugged, optimized, and iterated on existing game systems, improving stability and gameplay quality while adapting features based on testing and team feedback.

EtE Studio | *Junior Game Developer*

04/2020 – 05/2021 • Independent

- Independently designed and developed casual and hyper-casual mobile games using Unity and C#, implementing gameplay systems, game mechanics, UI, and player interactions from concept to completion.
- Built hands-on experience across the game development pipeline, including gameplay programming, game design, optimization, debugging, and iterative improvement of player experience.

EDUCATION

Tanta University | *Bachelor of Computers and Information*

08/2019 – 08/2023 • Tanta, Egypt

Major: Software Engineering & Programming
