SUMMARY

Game Developer with over 5 years of experience engineering and shipping high-performance games for Android, iOS, WebGL, and PC using Unity and C#. Expert in architecting engaging core gameplay loops, procedural generation, and highly optimized cross-platform architectures. Adept at driving monetization (In-App Purchases, Ads), integrating third-party SDKs, and writing scalable object-oriented code. Proven track record of leveraging Agile methodologies and cross-functional collaboration to deliver impactful results in remote environments.

TECHNICAL & SOFT SKILLS

- **Languages & Engines:** C#, Unity
- **Core Competencies:** Gameplay Systems, Procedural Generation, Enemy AI Logic, UI/UX Implementation, Object-Oriented Programming (OOP), Game Physics, Memory Optimization, Monetization (Ads, IAP)
- **Tools & Workflows:** Git/Version Control, Cross-Platform Development, Playable Ads (Luna), Agile/Scrum, CI/CD Workflows, Clean Code Practices
- **Soft Skills:** Collaboration, Problem-Solving, Self-Directed Learning, Time Management, Adaptability, Communication

EXPERIENCE

Sneet Games | *Game Developer*

02/2024 – Present • Independent

- Engineered and published casual mobile games from concept to release, maximizing gameplay quality, player retention, and visual fidelity.
- Architected robust gameplay systems, including procedural level generation algorithms and complex enemy AI behaviors using Unity and C#.
- Integrated monetization features and optimized mobile games for low-end/high-end devices, maintaining a stable 60 FPS and reducing memory overhead by up to 25%.

Squid Gun Studio | *Game Developer*

04/2022 – 01/2024 • Remote

- Collaborated with the team to design, prototype, and refine core gameplay mechanics.
- Conducted rigorous performance profiling and asset optimization, significantly improving frame rates by 30% and reducing loading screen times by 3 seconds on average.
- Executed iterative level design and applied advanced visual polish techniques, elevating the final project quality and market readiness.

Game4Life Studio | *Game Developer*

06/2021 – 03/2022 • Remote

- Contributed to full-cycle mobile game development and gained hands-on experience with CI/CD publishing workflows in an agile remote environment.
- Implemented new gameplay features, integrated responsive UI components, and delivered continuous project improvements based on player feedback and A/B testing insights.
- Ensured high-quality release standards by proactively resolving critical bugs, refactoring systems, and streamlining existing code architectures.

EtE Studio | *Game Developer*

04/2020 – 05/2021 • Independent

- Independently developed comprehensive mobile games from scratch, establishing a strong foundation in Unity, C# scripting, and game design principles.
- Iterated rapidly on core gameplay loops, focusing on strong game feel and improving player retention by 15% through enhanced interactions.
- Refined analytical problem-solving skills through continuous practice, rigorous debugging, and self-directed game development.

EDUCATION

Tanta University | *Bachelor of Computers and Information*

Major: Software Engineering & Programming

08/2019 – 08/2023 • Tanta, Egypt
