SUMMARY

Game Developer with 5+ years of experience developing games for Android, iOS, WebGL, and PC using Unity and C#.

Focused on creating engaging core gameplay loops, smooth player experiences, polished visuals, and optimized performance across multiple platforms.

EXPERIENCE

- Game Developer - Sneet Games

02/2024 - Present

I work independently under Sneet Games, creating casual mobile games with a focus on gameplay quality, player experience, performance, and visual polish.

Responsible for gameplay systems, procedural level generation, enemy logic, UI flows, project progression, and mobile optimization using Unity and C#.
- Game Developer - Squid Gun Studio (Remote)

04/2023 - 01/2024

Worked remotely with Squid Gun Studio, working as part of the mobile game development team.

Contributed to gameplay mechanics, prototype development, performance optimization, level iteration, and visual polish to improve overall project quality.
- Game Developer - Game4Life Studio (Remote)

06/2021 - 03/2022

Worked remotely with Games 4 Life Studio, gaining practical experience in mobile game development, teamwork, and publishing workflows.

Contributed to gameplay development, feature implementation, project improvements, and overall game quality in a remote production environment.
- Game Developer - EtE Studio

04/2020 - 05/2021

Worked independently under the EtE Studio name, developing mobile games while improving skills in Unity, C#, and game design.

Focused on learning, building stronger gameplay, improving player experience, and refining game feel through continuous practice and iteration.

EDUCATION

Software Engineering | Programming

Tanta University - Bachelor of Computers and Information

08/2019 - 08/2023

SKILLS

- Unity
- C#
- Game Physics
- Third Party SDKs Integration
- Clean Code Practices
- Problem Solving
- Version Control (Git)
- Cross Platform Development (Android, iOS, WebGL & PC)
- Playable Ads Development (HTML5, Luna)
- Object Oriented Programming (OOP)
